

PHP Assignment: Create 5 Math Operation Files

1. utils.php

Instructions: Create a PHP file named `utils.php` that contains the following functions:

- **addition(\$a, \$b)** : returns the sum of two numbers
- **subtraction(\$a, \$b)** : returns the difference of two numbers
- **multiplication(\$a, \$b)** : returns the product of two numbers
- **division(\$a, \$b)** : returns the result of division of two numbers

2. get_addition.php

Instructions: Create a PHP file named `get_addition.php` that:

- Includes `utils.php`
- Takes two numbers from **query parameters** (GET method)
- Returns their sum using **addition()**
- Example usage: `get_addition.php?a=5&b=10`

3. post_multiplication.php

Instructions: Create a PHP file named `post_multiplication.php` that:

- Includes `utils.php`
- Takes two numbers from the **request body** (POST method)
- Returns their product using **multiplication()**
- Example JSON body: `{ "a": 5, "b": 10 }`

4. put_division.php

Instructions: Create a PHP file named `put_division.php` that:

- Includes `utils.php`
- Takes two numbers from the **request body** (PUT method)
- Returns the division result using **division()**
- Example JSON body: `{ "a": 10, "b": 2 }`

5. delete_subtraction.php

Instructions: Create a PHP file named `delete_subtraction.php` that:

- Includes `utils.php`
- Takes two numbers from the **request body** (DELETE method)
- Returns their difference using **subtraction()**
- Example JSON body: `{ "a": 10, "b": 5 }`
